MACULA

Macular HD line

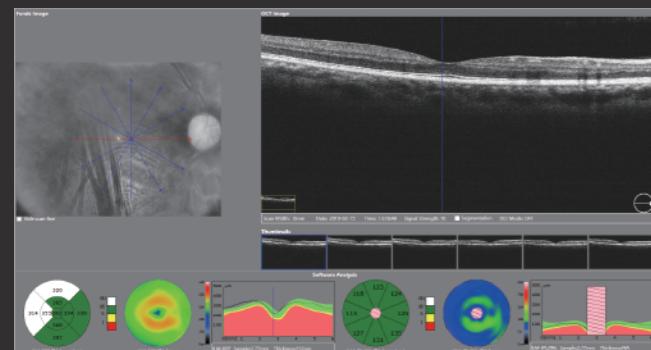

High definition OCT imaging reveals hidden pathological changes

* OCT scan range can be switched between 6 mm and 12 mm

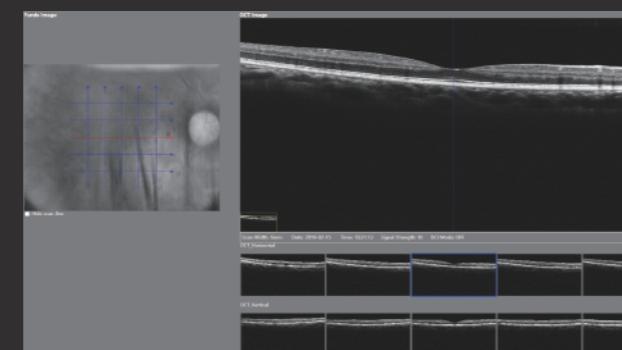

Macular Six-line Radial

Have a glimpse of the retina via HD imaging and quick data analysis

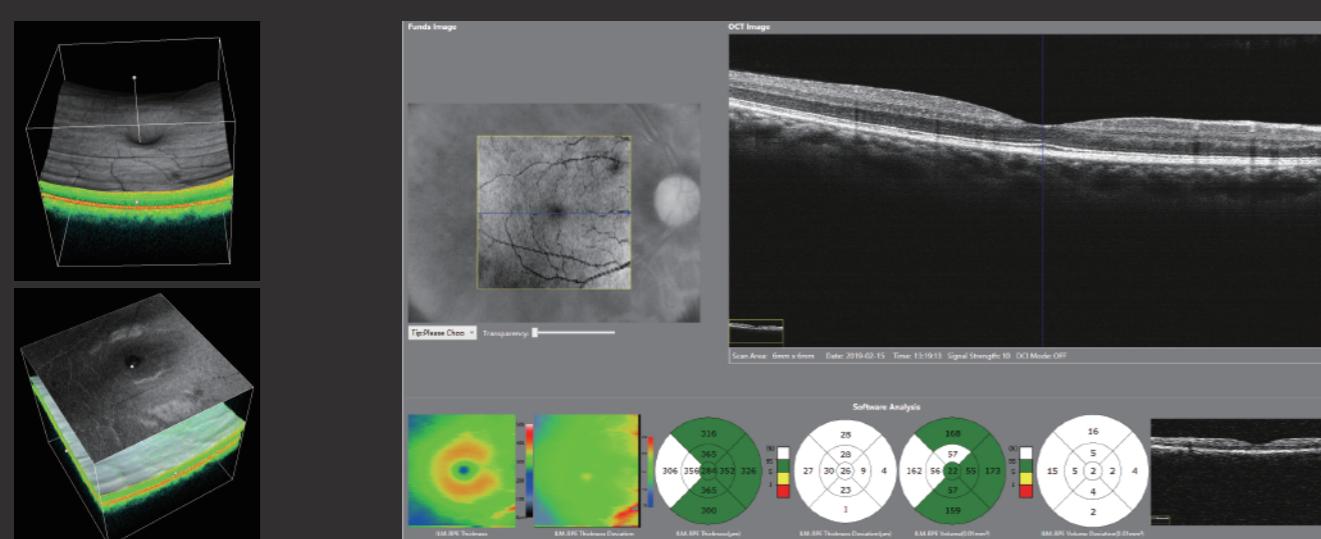

Macular Multi

Multiple HD cross-sectional images acquisition

Macular Cube

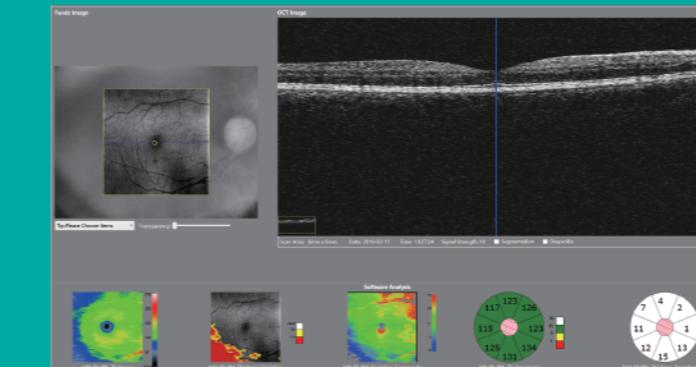

A point-by-point assessment of retinal thickness with a 500 x 100 dense cube

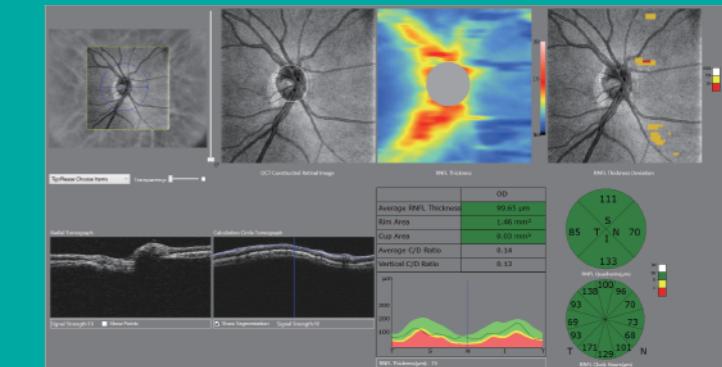

GLAUCOMA

For comprehensive glaucoma analysis, NEO SD-OCT offers two scan patterns, glaucoma cube scan in macular area and glaucoma cube scan in disc area. Evenly distributed sampling point with 200 x 200 A-scans provides reliable information for early glaucoma detection and management.

Glaucoma (Macular)

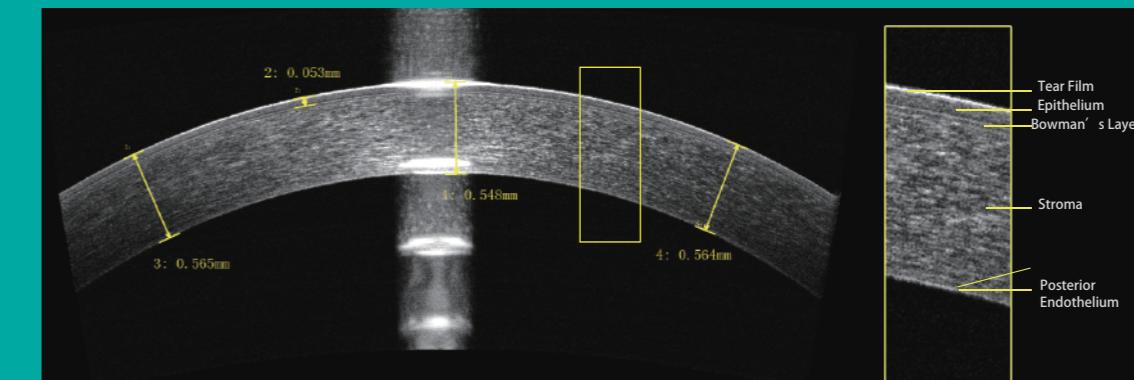

Glaucoma (Disc)

ANTERIOR SEGMENT

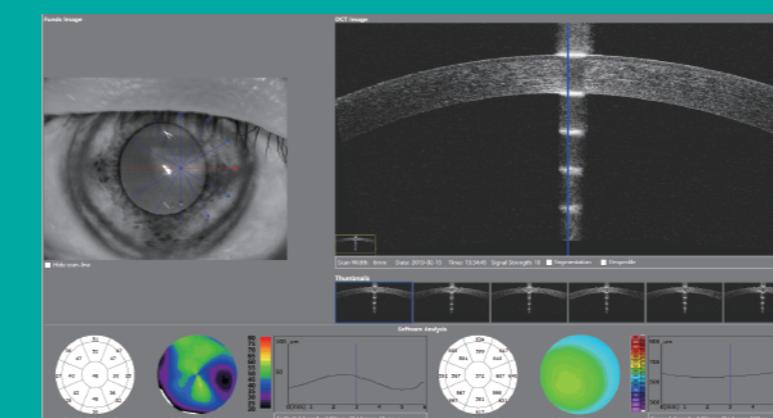

Anterior HD line

High definition OCT imaging of the cornea enables localization of the Bowman's layer, the interface between corneal stroma and epithelium

Anterior Six-line Radial

The anterior segment scanning through 6 radial lines of equal length can be used to measure the central corneal thickness

Software Analysis

- Corneal thickness analysis
- Manual measurement
- Epithelial thickness analysis
